

KINAX 2W2

Programmable transmitter for angular position

Application

The KINAX 2W2 (Figs. 2 and 3) converts the angular position of a shaft into a **load independent** direct current signal, proportional to the angular position. The unit is **contact free** and has **minimal mechanical abrasion** on the input shaft. It technically extends the delivery program of angular transmitters with a programmable version and thus creates a number of new technical application possibilities.

Features / Benefits

- Measuring range, sense of rotation, characteristic, switching point and other additional functions programmed using PC / Simplifies project planning and engineering, short delivery times, low stocking

Measured variable	Measuring range limits
Angular position	Programmable between 0 ... 10 and 0 ... 50 or 0 ... 50 and 0 ... 350 °

- Type of protection "Intrinsic safety" EEx ia IIC T6 / Can be mounted within the hazardous area (see "Table 3: Data on explosion protection")
- Simulation of measured values / The testing of the subsequent device chain is already possible during the installation phase
- Measured value acquisition / Display of the instantaneous value and a trend graph of the measured value on the screen
- Adjustment / Independent fine adjustment of the analog output, zero position and measuring range
- Characteristic of the output value / Programmable as a linear, V-characteristic, or any characteristic curve
- The shaft can be turned through full
- Patented measuring method

Layout and mode of operation

The transmitter consists of 2 main parts: the differential screen capacitor D and the electronic circuitry E (see Fig. 1).

Fig. 1. Block diagram.

The angular deflection α of the device to be measured is transferred to the rotor R of the differential screen capacitor with the aid of a mechanical coupling. It is then converted into a change of capacitance proportional to the angle.

All changes to the position of the rotor result in a change in the capacitance at the input to the microprocessor. This is transformed into a DC current signal proportional to the measured value.

Fig. 2. KINAX 2W2 with shaft dia. 2 mm, length 6 mm.

Fig. 3. Rear view with programming connector and connections for measuring output.

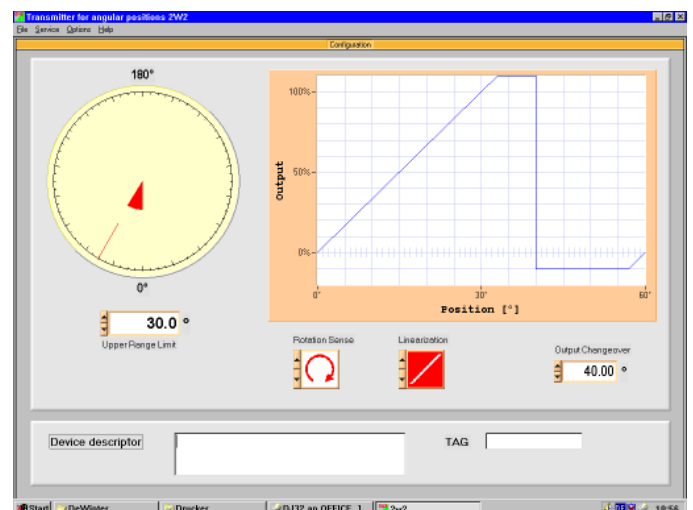

Fig. 4. Print screen example of the menu-controlled programming software.

KINAX 2W2

Programmable transmitter for angular position

Programming

A PC, the programming cable PK 610 plus ancillary cable and the configuration software 2W2 are required to program the transmitter. (Details of the programming cable and the software are to be found in the separate data sheet: PK 610 Le.)

The connections between "PC ↔ PK 610 ↔ KINAX 2W2" can be seen from Fig. 5. The transmitter can be programmed either with or without the power supply connected.

The software 2W2 is supplied on one CD and runs under Windows 95 or higher.

The programming cable PK 610 adjusts the signal level between the PC and the transmitter KINAX 2W2.

The programming cable PK 610 is used for programming both standard and Ex versions.

Fig. 5. Example of the set-up for programming a KINAX 2W2 without the power supply. For this case the switch on the interface must be set to «ON».

Technical data

General

Measured quantity:	Angle of rotation α \curvearrowright °
Measuring principle:	Capacitive method Differential screen capacitor with contact-free, non-wearing positional pick-up. Drive shaft fully rotatable without stops (patented measuring method)

Measuring input

Measuring range of rotation angle:	Programmable between 0 ... 10 and 0 ... 50 or 0 ... 50 and 0 ... 350 \curvearrowright °
Drive shaft diameters:	2 or 6 mm resp. 1/4"
Frictional torque:	< 0.001 Ncm with shaft dia. 2 mm < 0.03 Ncm with shaft dia. 6 mm resp. 1/4"

Sense of rotation of the drive shaft:	Programmable for sense of rotation clockwise or counterclockwise
---------------------------------------	------------------------------------------------------------------

Measuring output

Power supply:	H = 12 to 33 V DC (possible with standard version, non-Ex) H = 12 to 30 V DC (necessary with Ex-version, type of protection «Intrinsically safe» EEx ia IIC T6)
Output variable I_A :	Protected against wrong polarity Load-independent DC current, proportional to the input angle

Zero point correction:	Approx. \pm 5%
Span adjustment:	Approx. \pm 5%
Current limitation:	I_A max. 40 mA
Standard range:	4...20 mA, two-wire
External resistance (load):	$R_{ext} \text{ max. [k}\Omega\text{]} = \frac{H \text{ [V]} - 12 \text{ V}}{I_A \text{ [mA]}}$
	H = DC power supply I_A = End value of output variable

Load max. [Ω] with output 20 mA

Power supply [V]

Residual ripple in output current:	< 0.3% p.p.
Response time:	< 5 ms

Programming connector

Interface:	Serial interface
------------	------------------

Accuracy data

Reference value:	Measuring span
Basic accuracy:	Error limits at reference conditions $\leq \pm$ 0.5%
Reproducibility:	< 0.2%

Reference conditions

Ambient temperature	23 °C ± 2 K
Power supply	18 V DC
Output burden	0 Ω
Adjustments	350° version measuring range > 50...350° characteristic linear
	50° version measuring range ≥ 10...50° characteristic linear

Influence effects (maxima)

(included in basic error)

Dependence on external resistance Δ R _{ext} max.	± 0.1%
Power supply influence	± 0.1%

Additional error (maxima)

Temperature influence (- 25...+ 75 °C)	± 0.2% / 10 K
Bearing play influence	± 0.1%

Additional errors (cumulative)

Output characteristic	Definitions	Device version	Additional error
<p>simple "V" characteristic</p>	<p>Angle max. = MW Angle min. = 0°</p>	<p>350°</p>	$f = \left(\frac{0.18^\circ}{MW} \times 100 \right)$
<p>"V" characteristic with offset</p>	<p>MS = (angle max.) - (angle min.) Angle max. = ± final angle Angle min. = > 0°</p>	<p>350°</p>	$f = \left(\frac{0.25^\circ}{MS} \times 100 \right)$
<p>any characteristic</p>	<p>MS = (angle max.) - (angle min.)</p>	<p>350°</p>	$f = \left(\frac{0.25^\circ}{MS} \times 100 \right)$
		<p>50°</p>	$f = \left(\frac{0.09^\circ}{MS} \times 100 \right)$

KINAX 2W2

Programmable transmitter for angular position

Installation data

Dimensions:	See section "Dimensional drawings"		
Housing:	Chromated aluminium		
Mounting position:	Any		
Electrical connections:	Soldering terminals resp. screw terminals Protection class IP 00 acc. to IEC 529		
Permissible vibrations:	5 g every 2 h in 3 directions $f \leq 200$ Hz		
Shock:	3 x 50 g 10 shocks each in 3 directions		
Admissible static loading of shaft:	Drive shafts dia.	2 mm	6 mm
	Sense		resp. 1/4"
	radial max.	16 N	83 N
	axial max.	25 N	130 N
Weight:	Approx. 100 g		
Fixation:	3 cheesehead screws M3 or with 3 clamps		

Regulations

Electromagnetic compatibility:	The standards DIN EN 50 081-2 and DIN EN 50 082-2 are observed
Intrinsically safe:	Acc. to EN 50 020
Impulse voltage withstand:	1 kV, 1.2/50 μ s, 0.5 Ws IEC 255-4, Cl. II
Housing protection:	IP 50 acc. to IEC 529
Test voltage:	All connections against housing 500 Veff., 50 Hz, 1 min.
Admissible common-mode voltage:	100 V, 50 Hz

Environmental conditions

Climatic rating:	Standard version
	Temperature - 25 to + 75 °C Annual mean relative humidity $\leq 90\%$ or Version with improved climatic rating Temperature - 40 to + 75 °C Annual mean relative humidity $\leq 95\%$
Transportation and storage temperature:	Ex version
	Tamb max. + 56 °C at T6 resp. + 75 °C at T4

Basic configuration

The transmitter KINAX 2W2 is also available already programmed with a **basic** configuration which is especially recommended in

cases where the programming data is not known at the time of ordering (see "Table 1: Specification and ordering information" feature 7).

Basic configuration:

Order Code	Mechanical angle range	Measuring range	Switching point	Sense of rotation	Characteristic of output variable
760 - 1111 100	50°	0 ... 50°	55°	Clockwise	Linear
760 - 1211 100	350°	0 ... 350°	355°	Clockwise	Linear
